In my role as an OET Trainer, I focused on equipping healthcare professionals with the language skills needed for international practice, aligning with OET standards. My responsibilities involved creating and delivering targeted lessons across all modules: Listening, Reading, Writing, and Speaking. By incorporating medical terminology and scenario-based training, I enabled students to gain confidence in patient communication, documentation, and real-world healthcare interactions. Regular assessments, personalized feedback, and strategic guidance allowed me to support students effectively in achieving the scores required for their professional advancement, contributing to both their career success and patient-centered care.
